The critical study of the novels of Shobha De suggests that the concept of marriage in her works is portrayed as a complex and often conflicting institution. Shobha De's writings explore the struggles and challenges faced by modern Indian women within the confines of marriage. The novels delve into the psychological and emotional aspects of marital relationships, exposing the dichotomy between traditional values and the desire for freedom and self-assertion. In Shobha De's works, marriage is presented as a societal expectation where women are expected to make sacrifices and conform to traditional roles. The protagonists, particularly the female characters, undergo internal conflicts as they grapple with the pressures of adhering to patriarchal norms while seeking personal fulfilment and liberation. These women desire equal rights and freedom within their marriages, but they are hindered by conservative societal expectations. The novels also highlight the impact of societal changes, liberalization, and gender issues on marital dynamics. The characters face dilemmas and emotional turmoil in their relationships as they navigate between their desire for autonomy and the societal pressures to conform. Extra-marital affairs and emotional struggles become common themes, reflecting the deep emotional void and psychological distress that some characters experience within their marriages. Shobha De's portrayal of marriage emphasizes the importance of communication, understanding, and mutual respect in a successful union. The novels also shed light on the broader issues of gender equality and the need for societal transformation to empower women and create more equitable relationships. Shobha De's critical study of marriage in her novels serves as a mirror to the complexities and challenges faced by modern Indian women in their pursuit of love, freedom, and self-discovery within the context of marriage and society.

2.1 Evolution of Marriage in Literature
The portrayal of marriage in literature has undergone a fascinating evolution, reflecting the shifting socio-cultural landscapes of different eras. In ancient literature, marriage was often depicted as a contractual arrangement, serving political, economic, and social purposes. Greek tragedies like Sophocles' "Antigone" showcased marriages as instruments of power consolidation, while medieval romances such as Geoffrey Chaucer's "The Canterbury Tales" explored themes of courtly love and chivalry within marital contexts.

With the advent of the modern novel, authors like Jane Austen ushered in a new era of marriage-centered literature. Austen's novels, including "Pride and Prejudice" and "Emma," offered incisive commentary on the socio-economic dimensions of marriage for women in 19th-century England. As literature progressed into the 20th century, authors like Virginia Woolf and Edith Wharton delved into the psychological intricacies of marriage, examining how it shaped the identities and freedoms of individuals.

In contemporary literature, marriage has become a canvas for exploring the complexities of human relationships. Authors like Kazuo Ishiguro, in "Never Let Me Go," and Zadie Smith, in "On Beauty," use marriage to probe existential questions about love, mortality, and societal expectations. This evolution in the portrayal of marriage underscores its enduring relevance as a literary theme that continues to resonate with readers.

3. The Cultural Context of Marriage in Shobha De's Novels

3.1 Traditional Notions of Marriage in Indian Society
Marriage has been deeply ingrained in the fabric of Indian culture for centuries. Rooted in religious and social traditions, traditional Indian marriages were often arranged by families with the primary goal of maintaining social status, caste purity, and economic stability. The institution of arranged marriage carried a sense of duty and responsibility, with couples often meeting for the first time on their wedding day. Marital harmony was viewed as a collective effort, involving the participation and approval of extended families and communities. The emphasis was placed on the compatibility of families rather than solely on the desires of the individuals involved. This traditional framework had a significant impact on gender roles within marriage. Women were often expected to assume submissive roles, prioritizing the well-being of the family and adhering to the expectations of their in-laws. Marriages were often cemented through elaborate rituals and ceremonies, symbolizing not only the union of two individuals but also the merging of two families.

3.2 Modern Shifts and Challenges
The late 20th and early 21st centuries witnessed a gradual departure from these traditional notions of marriage in India. Urbanization, education, and exposure to global perspectives led to the emergence of a generation that sought more autonomy in their personal lives, including their choice of partners. The rise of love marriages challenged the dominance of arranged marriages, enabling individuals to prioritize emotional and personal compatibility over social considerations. Modern marriages in India are increasingly characterized by changing gender dynamics. Women are seeking education, pursuing careers, and aspiring for independence, reshaping the power dynamics within marriages. Marital relationships are now expected to be built on mutual respect, communication, and shared responsibilities.
