Abstract

Education is the base and the building of the any nation it crate the skills, knowledge, habit and standard of the students. Health is also the major concern of the nation that the responsibility of national government. Corona virus disease (COVID-19) is an infection disease that is caused by the SARS-COV-2 Virus.

Most people are infected with virus mild to our respiratory system illness Recover without special treatment. However, some will become seriously Illness and recover without special treatment. Some will require extra and serious medical treatment. The younger people are recovering fast and not need to extra treatment but the older people and those with underlying medical condition like cardio vascular disease, diabetes, chronic aspiratory. Disease or cancer is more likely to develop illness. The best way to prevent and slow down transmission is to be well informed about the disease and how the virus spreads.

The petrifying and severe impact of covid-19 has the impact on over the India. Further the government around the word the government arrange the some new technology for the closure of the world. India also the part of national world lockdown has closed all the institution. The major impact on the School going students to post-graduate students. Digital education is also come in nature for avoiding the disturbance of the students learning that the minimum spreading the virus of students until resume the classes. The education sector in India from school to university can use learners in the future. This paper shows the lights on the impact of covid-19 on the education system.

Keywords: Covid-19, Pandemic, Education, Teacher, Parents

Introduction

Proper and good education is very important for the entire nation. It facilitates the quality learning through life among people of any age group, caste, religion. It is process of achieving the knowledge; values beliefs and moral education improve the one's knowledge. Corona virus disease (COVID-19) is an infection disease that is caused by the SARS-COV-2 virus. Most people are infected with virus mild to our respiratory system illness and recover without special treatment. However, some will become seriously illness and recover without special treatment. Some will require extra and serious medical treatment. The younger people are recovering fast and not need to extra treatment but the older people and those with underlying medical condition like cardiovascular disease, diabetes, chronic respiratory disease, or cancer are more likely to develop illness. The best way to check and slow down spread is to be well informed about the disease and how the virus spreads. Protect yourself to the other and slow down communication is to be well informed about the disease and how the virus spread. Protect yourself

to proper using of sanitizer, wearing mask, staying at least 1 mitre distance from others and washing your hands with alcohol-based rub frequently. And the vaccination is also help people to prevent the corona virus disease. The virus can spread from an infected person's mouth or nose in small liquid particles when they cough, speak, sing or breathe. It is important to practice antiquely, for example by coughing into a person are infected very fast way if we are touch any infected person then it will very fast in nature.

Causes of Covid -19

The common symptoms of Covid-19 are as follows:-

1. Fever
2. Anxieties
3. Painful Infection on throat
4. Muscle aches

Literature Review

The paper has summarized that the teaching has shifted from the physical to online education system. Due to the pandemic revolution in teaching and the methodology of teaching into the online education system resolve the ways which is arise due to the pandemic that time there has been a close of school and closure of education institution.

This paper review the covid-19 has a severe impact on the education system and the students. That time it was face many challengeces and opportunity. The Indian government are trying its best way of teaching to cope up with the present situation and resolve and try to best way to face in pandemic situation. All the education institution are strengthen their knowledge and technology that the face in the duration of Covid- 19.

Objective

1. To study the impact of covid-19 on education.
2. To analyse the advantages and disadvantages of online study during the pandemic.
3. To Study the impact of Covid- 19 teachers.
4. To Study the impact of Covid -19 on students

Research Methodology

We study on the various national and international research papers were studied on covid-19 pandemic to collect the data for the present study. The all information are collected from the secondary data and previous newspapers we are suffering many journals and websites related to impact on covid-19 on education, impact on teachers, impact on methodology of education that we are learning at that time,

impact on students and so are many journals and websites we are surfing and study the previous reaches that had done by the reaches.

The lockdown has given them ray of hope for teacher and students to continue their educational activities online. The teachers are delivered their lecture with the help of internet with the help of many applications like the zoom, Google meet and you tube these are the source of the communication the students with the teachers.

The national wide closures that close of all national around 90% of world are closure at that time.

After observing the corona virus pandemic situation, the WHO advice keeps the social distancing as the first prevention step. The education institution are closed during the lockdoun and all country follow the social distancing

Impact on Covid– 19 on Education

Corona virus disease (COVID-19) IS AN INFECTION disease that is caused by the

SARS-COV-2 virus. Most people are infected with virus mild to our respiratory system illness and recover without special treatment. However, some will become seriously illness and recover without special treatment. Some will require extra and serious medical treatment. The younger people are recovering fast and not need to extra treatment but the older people and those with underlying medical condition like cardiovascular disease, diabetes, chronic respiratory disease, or cancer are more likely to develop illness the best way to prevent and slow down transmission is tube welling formed about the disease and how the virus spreads.

Causes of Covid-19

The common symptoms of Covid-19 are-

1. Fever
2. Anxieties
3. Painful Infection on throat
4. Muscle aches
5. Blocked nose
6. Runny nose
7. Eyes infection
8. Persistent cough

Covid-19 has affected a large number of students across the world the close down of all schools and the education institution are suffering the large number of population and then it was shifted traditional approached to the digital online platform. The problem that face by the students that have not proper source of to connect the education system the absent of schooling would also have a long distancing effect on the human health. the budget of government are also very effected the population people not have the sufficient food for their survival.

Due to the pandemic further shocks to the system with schools force to shut down during the lockdown situation if we are talk about the students there are 250 million of students that affect the covid-19 .

And the basis of data there are 25.57 cores in 2021-22 and if we saw a data on 2020-21 it was 11.5 lakh that Shaw the very adverse situation on the education system.

Evaluate the advantages and disadvantages of online education during the pandemic

Covid – 19 have power over every sector of the economy, but the most affected sector that face major problem that was education sector due to the closure of school, colleges, and all educational institutional are closed that time .

And then there are some ways to adopt that help to continue their education because the most sensitive sector is the school going students we adopt a new technology like the online learning we are adopted. There are some advantages that we are seen and some disadvantages also face by students, teachers, and parent's also hare we are discuss some advantages and some disadvantages also.

Advantages of online learning

1. Improve the quality and standard of education system.
2. Teachers are also aware about the new learning technology.
3. It is very low cost technology.
4. Time boundation is also reducing.
5. We cover a large number of areas.
6. Face to face interaction between teacher and students.

Disadvantages

1. Lake of resources students are not utilise the online learning technology.
2. Most of the problem faces by the rural areas students.
3. The major problem that are face by the parents due to lack of knowledge.
4. Teacher is not aware about the online platform.
5. Net connectivity are not cover all over are area.
6. India's government are also facing the major problem due to the shortage of budget.

Study the impact of covid -19 on students

Corona viruses is the type of virus that effect the human health very march in the year 2019 the first time it was Shawn in India after that it was affect all over the India basically it was affect our respiratory system .People who have higher health issue that had higher risk.

The person who are suffering from virus and who have symptoms are wearing proper mask while they are feel uneasy mask will be wear when interacting others and while outside the of their household. and it is must that the testing is essential if we are feeling uneasy and we know that the testing capacity are limited, and the test should be limited, where testing capacity is limited, tests should first be done for those at higher risk of infection, such as health workers, and those at higher risk of severe illness such as older people, especially those living in seniors' residences or long-term care facilities.

Remedies-

1. As rates fall, it is more difficult to know how many people that have Covid-19and do not have any treatment. At the beginning of the pandemic, 15% of people were thought to become seriously them unwell and required a oxygen gas and hospital treatment. Those doctors are suggesting that hospitalization is required in around 3% of people with covid-19.

2. Most people make a full recovery without a hospital treatment. For those that are covid-19 who have a high risk of illness. WHO has the recommendation on which the drug treatment others and while outside the of their household.

CONCLUSION

The education sector is facing many problem the main thing is the main problem that are face by teachers as well as stu7dents also. In this paper we are discuss the advantages and the main problem face by the students. There are many challenges that are face by the population. At a rural area the 4G network are very slow and not cover the all geographical area and the people are not very economically strong. Online teaching offers flexible in teaching technology and change the traditional technology of education. One thing is very important in online teaching that are student central approaches are in the nature. Indian student, parents and teachers are not comfortable with the new technology of the online learning programme. The system is required to work on our teacher training for online and parents are also aware about the online teaching approaches. In this paper we try to all arrears like the impact on education, impact on teacher and the methodology of teaching are also discuss.
