

# India: Enroute to a Global G5 Entry

Ms. Neha Singh

## Abstract

India's democratic rise- its geopolitics, its soft power and its global governance.

## INTRODUCTION

In order to examine and bring forth many solutions for the smooth running of a democratic country, we all as citizens need to know and understand all the factors that go into running a focused, a sharp and successful democracy. Our long-term solutions should incorporate all types of structural changes and reforms that can survive and deliver even under the most chaotic and trying circumstances. The word 'constitutional' implies that the laws and reforms being implemented have to originate from the constitution. As such, the Indian government and its legislative bodies have to see to it that India is a SOVEREIGN SOCIALIST SECULAR DEMOCRATIC nation and Republic most resolutely.

The most urgent threat facing the nation is the emergence of the COMMUNIST state of China whose association with the ISIS and other failed neighboring countries is proving to be a great threat to the successful running of our INDIAN juggernaut that is propelled towards a greater future with utmost surety.

## THE GENERAL TROUBLES FACING INDIA

This is a rough list and enumeration of what types of problems the democracy of India is facing presently-

### 1. CROSS BORDER TERRORISM

Most countries that border with the geographical Indian states- nearly all of them have the problem of cross border infringement especially some Islamic countries like Bangladesh, Afghanistan and Pakistan. Many of their rogue army leaders keep sending terrorist's and militants across the border (funded mostly by the West) to trouble and kill as many Hindus as they can militarily.

### CHANGES NEEDED

- India should create a wall or a physical landholding barricade all across the terror-facing countries, along Jammu and Kashmir and also along the Indian states bordering China along the Northeastern borders of the country.
- India should not go easy on the punishments and confessions of its arrested terrorists
- All Indians should be wary of the rampant practice of LOVE JIHAD of various cross border insurgents and their friends and relatives should not be naturalized as Indians or Hindu Citizens of the nation-state.
- Many internal terrorists arise out of their collective failure to get seats in the country's dazzling STEM and MANAGEMNT and Public Servant productions- this should change and such failures should be trained in all other types of business and entrepreneurial trade agencies.
- The larger LGBTQIA category of our country holds the most wasted and trafficked people creating utter chaos and very serious criminal offences. They should not be included in the mainstream private and public employment places with utmost certainty.

## 2. RURAL AND URBAN POVERTY

These are all the factors that pose a threat to the idea of a rich and prosperous regional rural India unfortunately-

### a. Migration

There are too many citizens from the remote and rural areas of our country who keep migrating into the urban areas leading to a lot of slums and illegal housing entities.

#### CHANGES NEEDED

- a. There should be a cap on how many domestic citizens are travelling to the metro areas of the country lawfully. The local municipal officials as also the state government officials should crackdown on them if they start building tarpaulin shanties in the urban cities and creating makeshift toilets on the drains of the pavements of the city they are in.
- b. Overpopulation  
Together with no family planning and the false promise of a better life, most such migrants keep birthing unlimitedly leading to an urban encroachment crisis nearly in all our urban areas and cities.

#### CHANGES NEEDED

- The Union government together with the State government should implement a 2 children per family quota for such illegal migrants.
- The Union government representative of the state concerned should count the population of every city and exercise restraining orders when such limits are trespassed illegally.
- The Union and state governments should implement attractive employment methods to keep the rural migrants back in their parent villages all over the country.
- The youths and Gen Z citizens of all villages should be educated about the ease of practicing farming amidst all types of attractive government backed farmer trade allowances.

### c. Disenfranchisement

Many displaced citizens across the country do not have houses to live in, they are just bribed and used by the opposition parties to vote against the ruling government's (all BJP ministers.)

### d. Urban cross border infiltration

This issue is so important that both the State and Union governments have to pay attention to it and find solutions urgently.

#### CHANGES NEEDED

- d.1. The country should build physical walls all along the national borders to contain illegal immigrants from all failed economies entering our country illegally.
- d.2. The local and Municipality governments should keep a track of all such stateless people entering the country illegally. Most of them are bribed to carry arms and ammunitions for terrorists. They are also used to traffic rural girls and they are cajoled or threatened to engage in the international drug trade.

### e. Low wages for farmers

Farmers across the country all have the same complaint- most of them are unable to payback the loans that they had to take in order to harvest their crops. This is the basic cause that is leading to their untimely deaths and suicides regularly. However, this trend is only visible in some arid regions of Vidarbha in the Western state of Maharashtra. Most other farmers from states like Punjab and the Northeastern and Uttarakhand states up North are quite successful in their farming practices.

### f. Low wages for menials

Some poor people doing low paying and menial jobs are exploited ruthlessly. House helps, plumbers,

janitors, employees of the Municipalities of each state, maids and several other menial job workers need a special unit that addresses their problems and the local governing bodies should also pay them attractively.

### **CHANGES NEEDED**

f.1 A separate department in each state's local government body should be set up urgently- this department should select members from their own professions and representations state wise routinely.

### **REGULATING BOLLYWOOD**

The high earnings of all films made in Bollywood is the reason why so many illegal trades are carried out in the largely unregulated but booming industry. The Underworld is especially attracted to function in agreement with various actors and actresses being threatened and held to ransom rather boldly.

Attached to this issue is the issue of threats that the Realty industry business owners face from the Underworld most regularly.

The threat of the country's narco terrorists has reached epic proportions pan nationally.

We must apprise the UN and other global security bodies of the various criminal and underworld influencers targeting India and all its citizens with a lot of negativity and pessimism, especially the rampant LOVE JIHAD murders of our Indian girls and women just to attain the citizenships of our country. Our nation needs to deal with the enemy discreetly.

### **CHANGES NEEDED**

a. Instead of appeasing the underworld and paying them randomly, the cops and officials from the local government should expose them, locate them and get them arrested legally.

b. Everybody knows that the American businessman George SOROS is the criminal mind responsible for the breaking up of the Indian economy. The American President who doesn't appear to be in the same league must work in tandem with the UNION officials like the PM's office to nab him internationally.

**CASE STUDY:** The successful reign of IPS officer SAMEER WANKHEDE

This young and dynamic officer has put in a lot of effort to expose and contain the narco terror trade taking place in and around Bollywood largely.

### **BRIBERY IN THE JUDICIARY –**

There is rampant bribery going on in all our judicial bodies, and this is true across most states except Gujarat and some Southern states like Kerala whose CM, leader Shashi Tharoor can be entrusted with some more serious responsibilities.

It is not a rumor spread across the country that Pakistan has employed some of its moles in the Indian judiciary, thereby gaining a lot of insights into the present and future plans of the economic progression of our country.

### **CHANGES NEEDED**

Such moles and ministers working for China and Pakistan should be arrested legally.

### **CRIMINAL CHIEF JUSTICES**

There are many rogue Chief Justices who openly grant favors to all of India's enemies ever so appallingly. There is no point in allowing even 1 or 2 of such hostile leaders into the highest echelons of power both in the government as well as in the judiciary. It is as if the PM is being asked to reform and rehabilitate all such rogue and evil and useless evil entities.

**CHANGES NEEDED**

Instead of accommodating such severely criminal or mental cases into power, they should be turned away rather skillfully.

**BRIBERY IN THE POLICE FORCES**

There are some large-scale corrupt practices seen in our police forces with nearly every officer giving and taking bribes- this could be due to the meagre salaries of the constables and lower cadre police officers- it could also be due to the treachery of bribery by all the country's industrial and criminal units trying to pass some tenders or getting their licenses, even as some criminals seek to prevent jail sentences.

**CHANGES NEEDED**

We must learn to use robots and AI more instead of our human policemen and women as the damage done appears to be irreversible.

**GLOBAL THREATS TO THE PARLIAMENT****PAKISTAN**

Many international countries are trying their level best to turn India into a rouge colony. Most of them, like Pakistan and Afghanistan, have the unequivocal support of the Imperial countries of the West like the US and the EU countries.

**CHINA**

China is the biggest enemy of a progressive and peaceful India and all its intentions have been laid bare by our international intelligence agencies.

**CHANGES NEEDED**

The only countries worth aligning with are Russia, Germany, Japan and to a certain extent, Israel all 4 of which are our well-wishers and have always been our friends more than our enemies.

**INTERNAL THREATS BY SOME ROGUE LEFT LIBERAL GANDHIAN FORCES**

The country is facing some serious crises from our previous political and historical dynasties. These people are totally without any utility to the Indian cause as they are too steeped in their over-the-top Epicurean luxuries.

There are still some Nehruvian forces rampant in the governments of our national and state level politics- they should all be sidelined and demoted from all their respective posts similar to what they and their Imperial Sorosian influencers had done to our native Hindu people and practices.

**CHANGES NEEDED**

Stop nepotism and dynastic politics- create more vacancies for common people to access the Union and State parliaments.

**PARLIAMENTARY ILLITERACY**

Nearly all members of the parliament, mostly from our rural areas, keep disrupting the sessions and they also get violent and aggressive. Many ministers from the Opposition have turned rogue and hence, they refuse to let any constructive dialogues or debates happen during the parliamentary sessions. Many much louder ministers and bully rogue candidates keep drowning out the voices of many of the parliament's more educated and responsible candidates.

**CHANGES NEEDED**

- a. Nearly all ministers getting elected into the parliament should be postgraduates in their respective fields. Any violent or destructive behavior should be penalized with at least Rs1000 per offence.
- b. The speaker of the parliament should be the only authority to silence the dissenters and the only parliamentary official to decide the punishment.

**THE INDIAN PARLIAMENT****1. THE LOK SABHA/RAJYA SABHA**

We are a country of some 140 billion people, how is it possible to rule over them just with 1 parliament? Also, India is poised to become the only Southeast Asian country whose neighbors want to be a part of the Indian subcontinent, especially Afghanistan, Pakistan and Bangladesh, and also Sri Lanka additionally. Just a single 2 house parliament system is not enough to run such a large country efficiently. Also, passing legal bills should become easier and faster across all houses of our parliament.

**CHANGES NEEDED**

- a. Our country desperately needs a second parliament system urgently.
- b. Also, passing legal bills should become easier and faster across all houses of our parliament. We should rely on humans less and use as much technology as is possible.

**2. THE SPEAKER**

Most speakers are always insulted and humiliated inside the parliament. The ministers make too much noise and indulge in unnecessary violence-

**CHANGES NEEDED**

As such, the speaker should have a PhD and the authority to pick ministers out and punish/penalize them strictly.

**THE HISTORY OF THE INDIAN PARLIAMENT**

India gained independence from the Imperial British rule in the year 1947 when an Indian constitution was built with the help of the most literate DALIT representative in all of India's history- namely B R Ambedkar who built the Indian constitution together with the help of Veer Savarkar, both of whom were extremely against the Gandhian doctrine of peace over war and to take military action against a rogue and extremely violent state bordering to the West of India's map forming a large border on the Western side of the newly free country. The country was divided into a Hindu state and a Muslim state with the Muslims of the country being asked to relocate to some areas reserved for them in the Northwestern region of the Indian subcontinent. Pandit Jawaharlal Nehru was the elected PM of the country appointed by the British to enable them to benefit from all the economic revenue coming in due in large to the agricultural and business trades of the largely fertile and progressive colony. In that sense, the British never really left the country being too tempted to usurp and attach all the kingly and religious relics of the previous kingdoms and monarchies of the country.

**CHANGES NEEDED-**

India was reeling under the single overrule of the Mughals before the British invaded and conquered them most ruthlessly. Most Indians today are taught and instructed to hate Hinduism and its ideology because of the simple reason that the native Hindus of the country were unable to reject and repel the conquest and overrule of the British and hence, the Caucasian Queen and her Empire with LONDON being set up as

the defacto capital of the chiefly agrarian and largely business oriented outpost of the original colonial monopoly.

The BJP is trying to reconvert the native Hindus back to their largely pluralistic Hindu ideology. 'Each Indian citizen should be proud of his religion and his country' being the pledge of the now steady Hindu government that is doing its best to heal and rejuvenate the collective Hindu identity. The BJP is trying to make the Hindus vote for themselves and their own people instead of turning to some exploitative and foreign agencies desperately.

There has been so much reservation and caste-based politics that nearly all backward citizens, their families and all types of tribals and SC, ST people are getting the best deal in all of India's history-

### **CHANGES NEEDED**

- a. The quotas and reservations should be nixed or minimized at least so that the general category doesn't have to bear the brutal blunt of reduced seats and so that they don't have to toil away for most of their adult lives really painfully.
- b. The national government should realize that due to the size and population of the country, just a single government ruling over the States and UTs is just not enough in reality. Can the PM suggest to make the country a 2-parliamentary system with the second parliament working in some other state capital city? Mumbai can work like a second parliamentary agency looking after the business and trade issues and troubles that most commerce-based industrial bodies face regularly.

The rise and rise of the Bharatiya Janta Party

The BJP, under the able leadership of its able PM Narendra Modi, has worked hard to get the collective Hindu identity back into one of a winning and progressive nation with a predominantly Hindu ideology. We do not have to be ashamed of our languages, our lifestyles, our religions, in fact, we must go back to screen out all the heritage that we had lost over the period of some 470 odd years of being ruled over by some alien forces that were just interested in plundering and defacing our collective Hindu existence as an advanced and prosperous cultural central Southeast Asian subcontinental supremacy. The invading monsters were driven by envy, greed and jealousy and a seething desire to destroy anything that was so superior to them intrinsically. Today, as we stand to enter the league of the prestigious G5 and G3 nations globally, we must throw out any pessimistic or limiting ideas and ideals that may keep us back even temporarily.

The BJP is only 12 years old but other older BJP members still hold the distinction of being evoked and saluted despite the fact that they lost to our marauding global invaders ever so bravely. Atal Bihari Vajpayee, Lal Bahadur Shastri, Lal Krishna Advani were several years ahead of their times during their terms of service. The rule of the BJP has brought us a lot of accolades from all over the world unceasingly. Every second country is engaging with us in trade and international business. Our Indian bureaucrat Ruchira Kamboj has won us a permanent seat at the UN Security Council ever so famously. Neha Mishra is another younger UN member who serves at a Council seat, representing India at many global UN meets and conferences.

### **Conclusion**

The idea of a prolific and independent India headed towards a G5 or G3 status worldwide is something that all Indians are extremely proud of receiving thankfully. After enrolling into the BRICS, the ASEAN, and after assisting Israel and Russia generously, India has all reasons to shine and move ahead and forward most graciously. Many other regional countries are looking up to our leadership. We cannot invite them all under our umbrella rule, but we can surely live up to the trust that they have in us ever so diligently.

However, we have to be prepared to face all our geopolitical enemies cautiously. China, Pakistan, Afghanistan, Bangladesh will keep trying to drag us down into the deep abyss that they have implemented for their own countries unfortunately.
